A fast, frantic and aggressive crossover between grindcore and thrash metal!

Now onto their fourth full length album entitled "Satanic Surgery", the Dutch grindcore/thrash metal outfit **Collision** brings you again a dirty alcohol fueled aggression thrill ride right from the very bowels of the abyss! Fast, frantic and short songs that pummel and punish are repeatedly battered out into your ears at an unrelenting rate of knots, caring little for your sanity as they rip your senses a new one! Possibly more intense and guaranteed to mosh up any metal, grindcore, and hardcore-punk crowd **Collision** now step up and kick your ass!

Surprisingly catchy for such a high octane and ballistic album, **Collision** bounce from one head banging hair twirling moment to the next with a sense of pure destruction at the core of every song! If you want an album to cause maximum damage whilst battering it's way though thirteen adrenaline fueled vitriolic time bombs, **Collision** has the answer!

The artwork is again done by Luis Sendon (Obscene Extreme, Macabre, Brutal Truth, Paul Di'Anno, Nashgul)!

For fans of: Napalm Death, Repulsion, S.O.D., Wehrmacht, Municipal Waste, Slayer
